

# Sales Dashboard for a E-commerce Platform

## Tableau Project

DigiComp is a global enterprise that, among other things, caters to designing, developing, manufacturing and marketing products like - clothing materials.

DigiComp has expanded its presence across the globe, and the business wants to get an in-depth analysis of its sales so as to make better sales decisions. So, DigiComp has decided to use Tableau Dashboards to consolidate the data from multiple sources, and carry out the sales analysis. This will help the sales department to access the data from remote locations that would increase the overall timeliness, and make better decisions.

- **The complete project is about E-commerce Platform and using this data came up with valuable insights.**
- **The complete data is from the time period 2014 to 2017. The data has 17 columns and 9994 rows.**
- **The field which the database has are as follows:  
Row ID, Order ID, Order Date, Ship Date, Ship Mode, Customer Name, Customer ID, Country, State, City, Region, Product ID, Category, Sub-Category, Product, Sales, Profit, Quantity.**

## Problem Statement

- **Comparing current year and previous year**
  1. Sales
  2. Profit
  3. Qty
- **Sales and Profit distribution by State**
- **Monthly Sales by Segment**
- **Yearly Sales by Region**
- **Total Shipment/Mode (Yearly)**
- **Total Sales by Category**

## Tableau Public Source

[https://public.tableau.com/views/Book1\\_16826312046000/Dashboard1?:language=enUS&:display\\_count=n&:origin=viz\\_share\\_link](https://public.tableau.com/views/Book1_16826312046000/Dashboard1?:language=enUS&:display_count=n&:origin=viz_share_link)

- Dashboard

- Comparing current year and previous year Sales, Profit , Qty

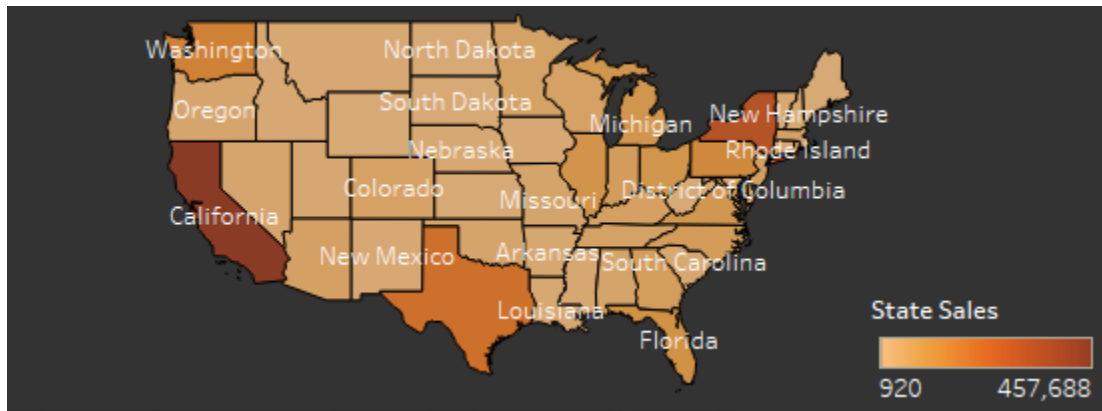

2017 2016 Min Max Value

### Insights:

- Total Sales increased by 24.08% compared to previous year.
